PHARMACOLOGICAL

DESCRIPTION:

YODAL® is a povidone-iodine based antiseptic solution. The antimicrobial spectrum of povidone-iodine encompasses gram-positive and gram-negative bacteria, fungi, protozoa and viruses. Alongside its disinfectant action it has excellent detergent power, which facilitates its penetration by means of mechanical action, while its excipients facilitate the permanence of the product on the skin, thereby prolonging its activity. This makes it ideal for cleaning and sterilising the skin, and its preparation for injections and surgical interventions.

INDICATIONS:

It is suitable for cleaning and sterilising intact skin and its preparation for injections and surgical interventions.

Mode of use

Use a cotton swab to apply a sufficient quantity to the area to be treated, and leave for 2-3 minutes.

PRECAUTIONS:

- It should not be used alongside mercurial preparations.
- External use.
- Do not take by mouth.
- Possibility of hypersensitivity upon contact with the skin.
- Do not use in people who are sensitive to its components or those with thyroid alterations.
- This product should not be used over a prolonged period of time or on large areas of the skin.
- Use with precaution in children under the age of 2.
- Avoid contact with the eyes, mucous membranes and sensitive areas of skin. In the event of contact, wash with abundant water.
- Its activity is reduced by organic matter.
- Keep away from children, food and drinks.

REGISTER No.: 500-DES
