# Diox

## DISINFECTANT AND ACTIVATOR

FOR PREPARATION  
CHLORINE DIOXIDE

DRINKING  
WATER

WATER PIPES

FOOD  
INDUSTRY

PREVIO DIOX is a broad-spectrum detergent for the treatment of water for animal and human consumption, and for disinfection treatment in the food industry. It is also suitable for water cooling systems.

### Diox

#### DESCRIPTION:

PREVIO® Diox is a broad-spectrum disinfectant for the treatment of water (viruses, bacteria, fungi...) in the food industry: fruits, vegetables, meat industries, etc. It is also suitable for water cooling systems. It disinfects water storage and distribution systems, also eliminating biofilms and algae. PREVIO® Diox disinfectant for water also prevents their build-up.

#### CHARACTERISTICS:

- This disinfectant for water does not add flavour or aroma to the treated water, and does not generate chloramines, toxic halogenated compounds or trihalometanos.
- It is a fast-acting product, thus reducing contact times, and it performs well in the presence of organic material.

#### MODE OF USE:

PREVIO® Diox is supplied in two separate components: PREVIO® DIOX component A and PREVIO® DIOX component B, which should be mixed at the time of application. Add both and shake for a few seconds. Depending on the water temperature, wait for the reaction to take place. Once it has taken place, dose directly in the water.

#### OBSERVATIONS:

After mixing components A and B, it is recommended to store the firmly closed container in a ventilated area, protected from the light and from extreme temperatures for a maximum of 30 days. Containers may not be reused.

#### — COMPONENT A COMPOSITION —

Sodium chlorite	1.55%
Excipients q.s.p.	100%

#### — COMPONENT B COMPOSITION —

Hydrochloric acid	13.5%
Excipients q.s.p.	100%

#### — FORMATS AVAILABLE —

Component A

24 Kg

Component B

1 Kg
